

## Development Platform Sustainable Village Goričko TRAJNOSTNA VAS GORIČKO – TVG™

### TVG™ Institute – Hub of Sustainable Technologies

The TVG™ Institute focuses primarily on the applied development using industrial hemp materials, sustainable technologies and boosts the production of advanced and innovative products. In doing so it cooperates with established carriers of knowledge and practices, creates projects and opportunities for private investors to invest and use EU grants for the green transition.

### INDUSTRIAL HEMP – WHY?

- ✓ **Hemp has been known** to mankind for centuries as a sustainable and useful raw material for various purposes
- ✓ **Hemp has a high value** of natural substances, and hemp products are 100% organic and biodegradable
- ✓ **Hemp has a negative carbon footprint**, restores and preserves cultivated areas
- ✓ **There is no waste during processing and use** and it is 100% usable for further processing
- ✓ **Extraordinary mechanical properties** of hemp fibers
- ✓ **Today it is the raw material for more than 50,000 products** worldwide
